

BaseStation3™ Offers Advanced Control Wherever You Are

Total Control – Anywhere

Valley® BaseStation3™ gives you unprecedented control over your operation. It's the industry's best on-premises solution for irrigation management in any terrain. Manage and control all your irrigation equipment from any smartphone, tablet or desktop computer.

With Valley BaseStation3, you don't need to plan your life around your irrigation schedule. You can schedule irrigation around your life.

*Requires Internet

**Using Aqua Trac integration

Go Beyond the Ordinary

See for yourself how much easier irrigating can be with mobile access*:

- Native apps available for iOS and Android devices
- Google Maps™ integration
- Monitor and control devices from anywhere
 - Provides alert notifications and instant, at-a-glance status updates
- Access alarms and status updates in real time
 - Stay up to date with text, email or push notifications
 - Soil moisture view shows soil moisture content by layers**
 - Operational view allows you to see what each machine is doing
 - Advanced data exports (applied water, equipment, etc.)
- Patented Valley Cruise Control™ and step programs for accurate rotation
- Destination ETA calculates how long it will take a machine to reach a specific point in the field
- Easily adjustable end gun templates for quick and easy setting changes
- Tiered levels of access and security for designated users
 - Allows multiple and simultaneous users

Valley Irrigation Exchange®

Available exclusively with BaseStation3

Technology has changed the way you operate your farm, making it simpler in some ways and more complex in others. The introduction of multiple software systems creates streams of data that can be difficult to integrate.

Valley Irrigation Exchange® solves these problems by making your irrigation data available across platforms, allowing you to make informed, data-driven decisions regarding water and nutrient management.

- Allows you to manage and monitor your irrigation equipment from within other farm management systems
- Lets you share irrigation data with your agronomist, industry-leading seed companies, equipment manufacturers and other providers
- Makes irrigation management tools available across multiple software platforms
- Leverages irrigation data alongside other farm information for maximum irrigation efficiency
- Executes recommendations developed in other partner software programs
- Provides a truly comprehensive approach to irrigation management

Control Your Data

- You select partners and grant access to your data
- You identify what data you want to share
- You make decisions and actively manage your irrigation strategy
- Conforms to all applicable software standards
