Product Code	Description	Extra Description
C014MG	WebGrip Clip Set MG	Bottom Clip/nut plus Phillip Screw Cheese Head M6x60 MS Gal
C032SM	WebGrip Clip Set SS	Bottom Clip/nut plus Phillip Screw Cheese Head M6x60 SS

Fixing Instructions

- Mark hole positions and drill through from the underside surface
- Ensure there are sufficient holes to anchor all areas of the plate firmly to the base structure

Cleaning

WebGrip's product coating is chemically inert, containing non-reactive properties and an extremely hardened finish. This means most cleaning agents, degreasers and solvents are suitable for use as a cleaning medium.

However solvents are the least recommended, but if used should be hosed off as soon as possible. For ease of cleaning, a high pressure water jet or steam is best, using a stiff broom for stubborn soiled areas.
